

Circuit Description

When one of the switch S1—S4 is connected, the circuit work at 9V voltage, then code IC PT2240 will send a code to 315 MHz sensor, which will get 315 MHz frequency. Then Q1 power amplifier the frequency with a code thru antenna.

Main components:

1. Circuit board
2. Code IC (PT2240)
3. Crystal sensor (315 MHz)
4. Power amplifier (R25)
5. Antenna
6. Button switch
